

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	SWTID-2026-6682
Project Title	Comic Craft AI
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	To develop an AI-powered application that helps users create comics from their story ideas by generating stories, characters, scenes, dialogues, and comic panels.
Scope	The project covers AI-assisted story creation, character generation, scene generation, comic panel creation, editing, previewing, and downloading of comics.
Problem Statement	
Description	Creating comics manually requires considerable time, drawing skills, and multiple design tools. Beginners may find it difficult to create characters, scenes, dialogues, and complete comic panels.
Impact	Comic Craft AI reduces the effort and time required to create comics and provides an easy platform for beginners and creative users.
Proposed Solution	
Approach	Use generative AI to transform user-provided story ideas into comic content, including characters, scenes, dialogues, and panels.
Key Features	☐ AI-based story generation ☐ AI character generation ☐ AI scene and comic-panel generation ☐ Comic preview and editing ☐ Save and download generated comics

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Hardware	Computing resources	Computer/Laptop, 8 GB RAM or above
Hardware	Storage	256 GB SSD or above
Storage	Programming Language	Python
Software		
Software	Framework	FastAPI
Software	Development Environment	Visual Studio Code
Software	Databas e	SQLite
Data		
API / AI Tool	AI Content Generation	Google Gemini API
