Project Name	Comic Craft AI
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I have many story ideas but don’t know how to turn them into comics.” • • “Creating every character and panel individually takes too much time.” • “I want an easy tool that can help me create comics quickly.”		THINKS • Thinks AI can make comic creation faster and easier. • Wonders whether AI can maintain consistent characters and storytelling across panels. • Wants a simple platform that allows creativity without requiring advanced drawing skills.
	PERSONA NAME (Role / User Type)	
DOES • Creates comic stories and characters using AI tools. • Experiments with different story ideas, dialogues, and visual styles. • Spends time trying to maintain consistency between characters and comic panels.		FEELS • Excited about turning creative ideas into comics. • Frustrated when creating characters and panels manually takes too much time. • Wants confidence that the final comic looks creative, consistent, and professional.
