

Solution Requirements

Date	29 September 2026
Team ID	SWTID-2026-6682
Project Name	Comic Craft AI
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	<i>The system should load pages quickly and generate comic content efficiently.</i>	High
2	Authorization levels	<i>The system should support an increasing number of users and comic projects.</i>	Medium
3	External interfaces	<i>User data and generated comic projects should be protected from unauthorized access.</i>	High

4	Transactions processing	<i>The system should remain available and handle errors without losing user data.</i>	High
5	Reporting	<i>The interface should be simple and easy to use for users with basic computer knowledge.</i>	Medium
6	Business rules, etc.	<i>The system should be easy to maintain and update when new AI features are added.</i>	High
7	Compliance to laws or regulations	<i>The system should protect user data and ensure that generated content follows applicable privacy and content guidelines.</i>	High
8	Other	<i>The system should allow users to preview, edit, save, and download their generated comics.</i>	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria

1	Performance & Speed	<i>The system should load quickly and generate comic content efficiently.</i>	<i>Page loads within 2 seconds under normal conditions.</i>
2	Scalability	<i>The system should support multiple users and an increasing number of comic projects.</i>	<i>Supports at least 100 concurrent users</i>
3	Security & Data Privacy	<i>User information and generated comics should be protected from unauthorized access.</i>	<i>Secure authentication and protected user data.</i>
4	Reliability & Availability	<i>The system should remain available and handle errors without losing user data.</i>	<i>99% uptime under normal conditions.</i>
5	Usability & Accessibility	<i>The system should have a simple and user-friendly interface.</i>	<i>Users can create a comic with minimal guidance.</i>
6	Other	<i>The system should be easy to maintain and update with new AI features.</i>	Modular and maintainable code.
