

Coding & Solution

Date	30 September
Team ID	SWTID-2026-6682
Project Name	Comic craft AI
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/sshanmugapriyacs31-pixel/comic-craft-AI
Programming Language(s)	[e.g., Python, JavaScript, Java]
Framework(s) Used	[e.g., Flask, React, Spring Boot]
Key Features Implemented	AI-powered prompt generation for storyboards • Dynamic comic panel layout grid editor • Automated image rendering with text/speech bubble overlays • Multi-page PDF and PNG export functionality • User authentication and saved comic library
Pending / Incomplete Features	• Real-time collaborative comic editing

	• Advanced animated GIF export option
Setup / Run Instructions	Backend: Run pip install -r requirements.txt then uvicorn main:app --reload Frontend: Run npm install then npm start Environment: Add OPENAI_API_KEY and STABLE_DIFFUSION_KEY in .env file

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:
