

Technology Stack

Date	29 September 2026
Team ID	SWTID-2026-6682
Project Name	Comic Craft AI
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side <i>(e.g., React, Angular, HTML/CSS)</i>	<i>HTML, CSS, JavaScript</i>	<i>Used to create a simple, responsive, and user-friendly interface for entering comic ideas and viewing generated comics.</i>

2	Backend / Server-Side <i>(e.g., Node.js, Python/Django, Java)</i>	<i>Python + FastAPI</i>	<i>Provides fast API processing and connects the frontend with the AI services.</i>
3	Database / Data Storage <i>(e.g., MySQL, MongoDB, PostgreSQL)</i>	<i>SQLite</i>	<i>Lightweight database used to store user information, comic projects, and generated content.</i>
4	Cloud / Hosting / Deployment <i>(e.g., AWS, Azure, Heroku, Docker)</i>	<i>Docker</i>	<i>Provides a consistent environment for running and deploying the application.</i>
5	Version Control & CI/CD	<i>GitHub + Git</i>	<i>Used for source-code management, project collaboration, version tracking, and backup.</i>

	<i>(e.g., GitHub, GitLab, Jenkins)</i>		
6	Third-Party APIs / Other Tools <i>(e.g., Stripe, Twilio, Google Maps)</i>	Google Gemini API	<i>Enables AI-based story generation, character creation, scene generation, and comic content generation.</i>
